

Consumer Intelligence

North Star · May 2026

Vision

Democratize intelligence for 1.4 billion Indians — making AI abundant, affordable, and accessible to every Indian, in every language, across every domain of daily life.

About JioBharatIQ

JioBharatIQ is India's daily AI companion — voice-first, multilingual, and built for everyday Bharat across health, devotion, entertainment, commerce, jobs, and more.

North Star Metric

Daily Engaged Conversations (DEC) = DAU x Conversations per User per Day

One conversation = one continuous session, regardless of modality (voice, text, or multimodal) or number of turns.

Goals

These define what winning looks like. Every product decision, investment, and OKR points back to one of these.

Goal	What it means	Headline target
Daily habit	JioBharatIQ is used every day across life moments — not just occasionally.	DAU/MAU 55%+ by Year 3
Scale	Reach every Indian with a smartphone, across every region, language, and income level.	500M MAU by Year 3
Life companion	Users come back for different reasons across their day — information, tasks, transactions, entertainment.	DEC 2.5B+ by Year 3
Commercial impact	JioBharatIQ creates measurable economic value through the transactions it enables and the revenue it generates.	Rs. 10,000 Cr GMV Rs. 8,500 Cr ARR by Year 3
Trust	Trust is a core product requirement. It has to be earned and maintained across every language and every user.	NPS 70+ Satisfaction 90%+ by Year 3
AI-native org	100% of the team uses AI as a primary workflow — not as a tool layered on top.	100% adoption at GA, and sustained there onwards

Three-Year Direction

Goal	What it means	Year 1 (from GA)	Year 2	Year 3
Daily habit	JioBharatIQ used every day across life moments.	DAU/MAU 25%+	DAU/MAU 40%+	DAU/MAU 55%+
Scale	Reach every Indian with a smartphone.	100M MAU	300M MAU	500M MAU
Life companion	Users return for different reasons across their day.	2 sessions/user/day	3 sessions/user/day	5 sessions/user/day
Commercial impact	Transactions enabled and revenue generated.	Rs. 1,000 Cr GMV Rs. 100 Cr ARR	Rs. 5,000 Cr GMV Rs. 750 Cr ARR	Rs. 10,000 Cr GMV Rs. 8,500 Cr ARR
Trust	Core product requirement for users new to AI.	NPS 50+ Satisfaction 80%+	NPS 60+ Satisfaction 85%+	NPS 70+ Satisfaction 90%+

Why We Win

Consumer Intelligence has structural advantages no standalone AI product can replicate.

500M users, Day 0: Pre-installed and default-on across Jio devices. No acquisition cost at a scale no competitor can match.

Jio ecosystem: JioMart, JioHotstar, JioFinance, JioCinema and more. Every conversation connects to a transaction.

Voice flywheel: A proprietary and compounding corpus of Indian voice interactions across languages and dialects.

Day 0 knowledge: Deep user context from JioID before the first session. Personalization starts immediately, not after months of usage.

Guardrails

These apply regardless of growth pressure.

- Trust floors are non-negotiable. Satisfaction and complaint rate thresholds are maintained at all times.
- Every production language meets the same quality bar. A gap in any language is a retention problem.
- Full DPDP Act compliance and data residency requirements maintained at all times.
- Performance on low-bandwidth connections is a product requirement, not an optimization.
